BETTER STRUCTURES WITH BETTER TECHNOLOGY

Building Information Model (BIM)

ILD has gone a step ahead by bringing internationally adopted 4D Building Information Modelling (BIM) in their projects. BIM is the latest way of approaching the design and documentation of building projects.

The model manages information that allows the automatic generation of accurate drawings and reports, design analysis, schedule simulation, facilities management and more – ultimately enabling the building team to make better-informed decisions. The BIM approach saves time and enhances productivity for a superior delivery of the final product.

Monolithic Aluminium Formwork Technology

It is an excellent replacement of the conventional technology with marked advantages in terms of structural stability, both on lateral movements, seismic forces, higher carpet area, uniform quality of construction, negligible maintenance and effect of wind forces on high rise buildings.

"Work with the Best" and "Deliver on Promise" forms the core of the progressive International Land Developers (ILD) Group. Mr. Alimuddin Rafi Ahmed, the Chairman of the ALM Group has promoted ILD to bring professional management, international design concepts, execution and the best of services to real estate.

Its' ILD Trade Centre, an operating commercial development on the prime Sohna Road of Gurgaon is a living example of excellence in planning and execution. Two of its successful residential projects, ILD Grand and ILD Spire Greens are in the advanced stages of construction and once completed will be the defining developments of Gurgaon.

Being ahead of the trend and offering effective living-space solutions has made ILD today a well-known and trusted player in the real estate market of India.

With a land bank of hundreds of acres in and around Delhi NCR, ILD's approach is to deliver unique developments in the exciting times ahead.
